Product Manager with a focus on Design and AI products. At MeinGPT, I'm building an All-In-One AI platform for German SMEs, scaling to +50.000 users and +250 companies. I design, plan and ship features on my own while taking qualitative and quantitative research as the foundation for every decision. I work with the philosophy that a product is not just a piece of software, it's the full experience you get – from seeing it for the first time to using it to recommending it to others.

B.Sc. Computer Science & Design – University of Applied Sciences Munich

Oct. 2023 - Now (Mar. 2027)

MeinGPT – SelectCode GmbH

Product Manager

Jul. 2026 - Now

- Establishing and building an AI-ready product development process
- Coordinating and establishing a new brand design across all channels (product, website, marketing, growth)
- Prioritize requirements and roadmap planning
- Bridge engineering, design and customers, turning feedback and usage data into clear requirements
- Build AI agents that turn feature requests and bug reports into tickets, estimate story points and review code
- Design, conceptualize and ship features end-to-end

Product Designer

Jan. 2026 - Jul. 2026

- Designed interfaces and interactions for an All-In-One AI platform
- Took new features from first idea to developer handoff while taking end-to-end ownership for a release
- Evolved the design system and the UI conventions MeinGPT is built on

Intern Product Designer & Full Stack Developer

Jul. 2025 - Jan. 2026

- Built frontend and backend features with TypeScript and modern web technologies
- Designed features and prototypes in Figma

Apple – Technical Specialist @ Genius Bar

Mar. 2024 - Jul. 2025

Working at Apple has given me deep insights into their understanding of a customer-first approach. During that time, I learned a lot about User Journeys and how a product is defined by its surrounding variables.
